**Subject:** Microsoft

To whom it may concern:

Let it be known that Microsoft is not a trust. The company works in a way that is best for the innovation of science and technologies, as I understand it -- it is not a male monopoly. Rather, the said company those all it can do to buoy innovation. This would constitute it being a valid scientific company.

Thank you for time and prudence in the laws relating to trusts.

Respectively yours,  
Giuseppe Del Vecchio
